Blade handle for surgical blade

Various types are available to meet diverse needs. Each is scientifically designed for smooth loading, functional handling ease and perfect balance. The handles are made of stainless steel(except DF-160S-3) to assure long life service and the blade integrates into the handle to form a single instrument. Handles No.3, 7, 3L and DF-160S-3 accommodate blades No.10,11,12,12d,14,15,15c,15s,370,390 and 390C. Handle No.4 and 4L are designed for use with blades No.20,21, 22, 23, 24 and 25.

DF-160S-3

80% size

Round-shaped handle made of titanium alloy. With smooth round shape, great weight balance and ideal length (160mm), this handle provide superior operability for incision in fine/deep area.

DLC coating

DF-160S-3 is coated with a diamond like carbon film (DLC) that offers superior performance and durability.

The carbon coating prevents the handle from rusting and corroding and the handle design allows for smooth loading of blades.

Sterile disposable scalpel

The Feather disposable scalpel is the last word in precision. Feather, utilizing feedback from surgeons, has developed a design with the sharpest cutting edge available today. Well-balanced construction, remarkable durability and in-the-package sterility further enhance total performance. Best of all, these throw-away scalpels are highly economical.

Economical & efficient

Fully automated Feather production and quality control systems are the reasons why these disposable scalpels are the first choice of surgeons everywhere. Feather disposable scalpels provide unsurpassed quality, uniformity and economy.

Indispensable in emergencies

Each scalpel is sterile and ready for use as soon as it is removed from the pull-apart aluminum wrapper. You can carry and use them.

Disposable scalpel - Standard

Disposable scalpel - Deep

These scalpels feature a plastic handle about twice as long as the standard type for convenient use in deep operations. Available with blades No. 10, 11, 15, 20, 21, 22, 23, 24 and 25.

Disposable scalpel - Mini

This type features a slender plastic handle and is highly suitable for use in surgery in limited areas. For example, the brain, nerves, ears, nose, mouth, plastic surgery, blood vessels, skin and infants. Available with blades No. 11, 14 and 15.

Disposable blood lancet

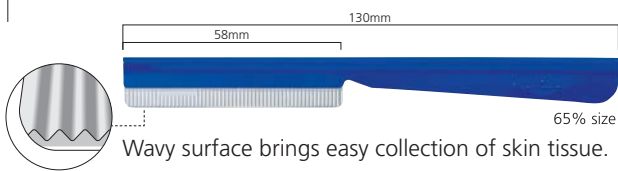

Feather Blood Lancet assures superior hardness and sharpness. Each lancet is individually packed and sterilized by Gamma radiation.

	Disposable blood lancet-SP/lancet
Dimension (mm)	40(L) x 5.4(W)
Material	Stainless steel
Packaging	One small box contains 200 pcs.

DERMATOLOGY

Disposable dermatome

	Disposable dermatome
Dimension	Blade (mm) 58(L) x 16(W) Handle (mm) 130(L) x 12(W)
Material	Blade : Stainless steel (specially processed blade)
Packaging	Sterilized by Gamma radiation at 25kGy. Box of 20 pcs.

Skin graft knife blade

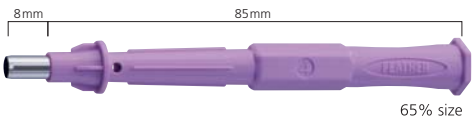

Feather skin graft knife blade is a disposable blade made of stainless steel. Its sharp edge offers a smooth grafting for the burnt skin. Skin graft knife blade (SGB-157) is compatible with the following knives: ROSENBERG, BRAITHWAITE, COBBETT, and WATSON.

	Skin graft knife blade(SGB-157)
Dimension (mm)	157(L) x 18(W) x 0.229(T)
Material	Stainless steel
Packaging	Individually packed in aluminum foil and sterilized by Gamma radiation at 25kGy. Supplied in a box of 20 pcs.

Biopsy punch

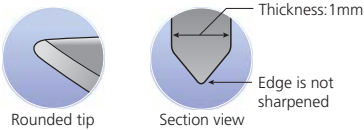

Feather Biopsy Punch offers excellent sharpness by ultra-precision sharpening technology which originates in surgical blade manufacturing.

	Biopsy punch
Inner Diameter (mm) / Product No.	1.5 / FBP-15 3.0 / FBP-30 4.0 / FBP-40 5.0 / FBP-50 6.0 / FBP-60
Material	Blade Stainless steel Handle Plastic
Packaging	Sterilized by Gamma radiation at 25 kGy. Box of 20 pcs.

Skin Scraper

Feather Skin Scraper is a spatula suitable for tissue collection for diagnosis of mycosis. Edge is not sharpened and it can be safely used without cutting skin. 1mm thick spatula allows firm and easy tissue collection. Autoclavable.

	Skin Scraper
Length(mm)	140
Material	Stainless steel
Packaging	1pc.

Chokkin (with strap)

Pocket-sized scissors designed for exceptional handling ease, cutting ability and safety. "Chokkin" scissors are small enough to fit in a nurse's pocket. And come with a holder and clip for easy access without damage to the pocket. The perfect tool for the day-to-day hospital routine of nurses. Blade edges are specially processed with fluoroplastic. Residual glue from adhesive tape will not cling to blade after cutting, thus assuring smooth cutting reliability of the scissors.

Improved Safety

The blade tip is rounded and protected with a plastic guard.
When cutting bandages, only the plastic guard touches the skin.
Thus, adding relief and reassurance to the patient during cutting procedures.

Friendly Design

"Chokkin" are designed with gentle, curved lines. ("Chokkin" also come in a special "koala" configuration for pediatric nurses that are designed to alleviate anxiety in younger patients.)

*Stainless steel blade with plastic handles (ABS resin, heatproof temperature : 70°C).

Disposable prep razor 1215-B
