Greatest Efficiency for
Smallest Incisions

AUFFARTH
MICS DOUBLE CROSS ACTION
CAPSULORHEXIS FORCEPS

G-32926 AUFFARTH
MICS DOUBLE CROSS ACTION
CAPSULORHEXIS FORCEPS
flat handle, cross-action,
for incision size 1.6 mm,
total length 100 mm

Prof. Gerd U. Auffarth, MD,
Clinical Director
University Eye Hospital Heidelberg

More freedom of movement through the smallest clear cornea incision (down to 1.6 mm):

- The narrow design guarantees great freedom of movement in the anterior chamber.
- The hand-crafted and precise forceps tips facilitate safe handling of the capsulorhexis.
- The overlying design of the forceps tips prevents the iris from getting caught in them, especially in cases of intraoperative floppy iris syndrome (IFIS).
